

Beyond Growth

A classical presentation

Overview

This presentation is suitable as an introduction to the topic of economic growth, and deals with the following aspects:

- > Economic growth in figures – GDP
- > Limits of growth – ecological footprint, peak oil and climate change
- > Decoupling – more growth with fewer resources?
- > Promise and reality of economic growth
- > Is sustainable growth possible?
- > Outlook

Instructions

The method takes the form of a PowerPoint presentation, after which comprehension questions are answered. If appropriate, the contents of the presentation can then be discussed.
